

An Eckert & Ziegler BEBIG Company

# Gleanings of ESTRO 2018

1990 ... 2018  
years

[WOLF Medizintechnik GmbH](#)

20.04.- 24.04.2018 [ESTRO 37](#),  
The European Society for Radiotherapy & Oncology  
[CCIB](#), Barcelona, Spain

we exhibited at the [industrial exhibition](#)

For us it was the first international event after signing the acquisition contract for Womed with Eckert & Ziegler BEBIG GmbH, Berlin in December 2017.

We were able to win the interest of other customer groups with the skills of our partners of Eckert & Ziegler BEBIG GmbH that complemented us very well.

We thank all the visitors of our common [booth no. 900](#) for their interest.

This year the superficial and intra- operative unit ioRT-50 was the sample on the Womed booth with the most interest for. It is completing our other units of conventional superficial and orthovoltage x-ray therapy, that remains an interesting alternative for the treatment of benign diseases and cancer at best economic and workflow conditions.

On Saturday evening, we concluded a successful and interesting exhibition day with a festive dinner in the atmosphere of the Òleum Restaurant [Museu Nacional d 'Art de Catalunya](#) in the circle of our business partners, customers and friends.

Thank You for the nice evening we had !
